THP218 LiteSmart Installation and Operation

Battery Installation:

1. Remove battery cover by sliding open
2. Install 3 new AA batteries according to the orientation diagram inside the battery compartment
3. Replace battery cover

Operation:

1. For constant light, slide switch to “ON” position
2. For light only when it is needed, slide switch to “AUTO”. The light will now be activated only when ambient light is low and there is motion nearby
3. Slide switch to “OFF” for storage
